

How to Solve

In a Codeword puzzle, the number in the box represents a letter. Solve the puzzle by identifying which letter matches each number.

Each puzzle uses all 26 letters and has only one solution. Hint letters are given to help you begin.

As you identify a letter and fill in the grid, mark the letter off in the A-Z row, and write it in the solution boxes at the bottom of the page.

Tip: Look for short words, double letters, and common letter pairs.

Solutions begin on page 103.
